

TIP #2 EMAILING PHOTOS TO YOUR SOCIETY/CLUB

The amount of data that people can send in one email varies, that's why we suggest that you send photos to your club one at a time.

iPhone and iPad

When emailing pictures from either of these devices, they often seem to reduce original photos to 800 x 600 when you email them.

To prevent this, email photos one at a time and select "original size" when prompted after you press the send button on an iPhone. On an iPad you have to click on the file size in the CC/BCC line to get the option to select size.

Desktop Computer

Attach the original file to the email rather than inserting it in the email. That way the original size is preserved.
